

/home/tomek/CLionProjects
/proi/proi-projekt/src
/core-lib/include/EventPublisher.h

```
graph BT; A["/home/tomek/CLionProjects  
/proi/proi-projekt/src  
/core-lib/EventPublisher.cpp"] --> C["/home/tomek/CLionProjects  
/proi/proi-projekt/src  
/core-lib/include/EventPublisher.h"]; B["/home/tomek/CLionProjects  
/proi/proi-projekt/src  
/core-lib/EventSubscriber.cpp"] --> C;
```

The diagram illustrates the relationship between three source files in a C++ project. At the top is a header file, `EventPublisher.h`, located at `/home/tomek/CLionProjects/proi/proi-projekt/src/core-lib/include/`. Below it are two source files: `EventPublisher.cpp` on the left and `EventSubscriber.cpp` on the right, both located at `/home/tomek/CLionProjects/proi/proi-projekt/src/core-lib/`. Blue arrows point from each source file to the header file, indicating that both source files include the header file.
